

Company Profile For Eltafantech Asia

Our History

Eltafantech Asia commenced operation on the 1st of December 2005 in Malaysia with a factory consisting of 5000 ft² of floor space. As business grew, we relocated in December 2007 to a new and larger premise in Kota Kemuning consisting of 35,000 ft² of floor space (see photo insert). As a subsidiary of Fantech Australia, we are proud to be the first ever manufacturing operation Fantech has established in the Asia region. Fantech itself was established back in 1973 and is now the

number one fan supplier to the Australasia market. Since 1997 we have been part of the Elta Group of companies, a UK based multinational fan company with a yearly turnover of more than £62 million. We have incorporated the logos of both Elta and Fantech to reflect the link that our company was built on.

Our Philosophy

As part of The Elta Group of companies, our philosophy is to provide quality fans and related ventilation equipment with proven technology, at an affordable price together with excellent customer service and technical backup. With Group companies on four continents, together with a network of distributors, we aim to provide globally competitive products with local service.

Our Range of Products

Eltafantech Asia is ISO9001:2008 certified. The products manufactured in Malaysia adhere to the same technical specifications and quality requirements that can be expected from both Fantech Australia and Elta Fans UK. With the advantage of being part of large international group of fan companies we have access to the latest products and newest fan manufacturing processes from around the world.
